

Hi my name is Lily and you asked me and all the other people writing this what the value of education is to us and what we hope to achieve with a higher education.

I want to go to college because I know how much it increases my opportunities to be a lawyer, or get any other job that I want and qualify for. I want to be a lawyer so I can help people, get them out of situations that they can't get themselves out of, and help people get the justice they deserve.

A higher education is important to me because it helps me learn new things everyday and be able to achieve new things on a daily basis for me. A higher education means that I could go places that I have never dreamed I could go. It helps others achieve great things also. Without a higher education we wouldn't be exploring Mars or be driving cars that don't use fossil fuels. A higher education is what helps us grow into the people that we want and need to be. A higher education is what we all need in the world that we live in so we can all succeed together.
