

Why I Want to Go to College

Hi, my name is Olivia Serrano and I personally believe deeply in the value of education. When it comes to school, striving for perfection is in everything I do. Working hard to get good grades and having fun while doing so, makes one well rounded. The challenge of learning new things always drives me to do my best, therefore the idea of going to college is very important to me.

I understand that education is the foundation to success, so the importance of education is immense. School offers skills and experiences that might be needed for certain careers. With higher education comes more endurance on your knowledge to use for your major in school.

Going to college has always been a dream of mine, along with the essentials of achieving a higher education. Higher education simply gives one a better chance at getting a good job. A job that will be needed to pay bills, take care of family, and meet all of the necessities needed to be an adult.

Personally attending college when I become old enough, will be to pursue my dream of helping others. I know just how important it is to go to college to achieve those dreams. Although I'm not sure what area or avenue that will be, I do know and will do whatever it takes to get to college.
