

## Why I Want to Go to College

My education has always been very important to me and I have always known that I would like to attend college someday so that I can further my education. In the future I hope to pursue a career in the field of medicine and I believe that going to a great college is a big part of achieving this dream. To me college is a necessary piece of a complete education. I want to receive as good an education as I can and I know that this is only possible if I go to college. College is very important in my life and I will do whatever I can so that I can go to college.

My goal of having a career in the field of medicine is almost impossible to reach without college. College can teach me the things that I will need to know to be successful in my profession and it will guide me through the journey of finding a great job. When I am older I want to have a great job that allows me to support myself and my family. Both of my parents went to college. This allowed them to get great jobs and allowed them to support our family. I hope that I can follow in their footsteps. I have worked hard so that I can be a good student and get good grades so that hopefully I can attend an amazing college that will help me accomplish my life goals just like my parents did.

I am thankful for the education that I have received because of my parents, teachers, and other mentors. All of these people have helped me on my journey to being able to go to a good high school and hopefully a good college.
