

Why I want to go to college essay

My name is Leann Braatz. I'm a thirteen year old girl and I'm in 7th grade. I've been on honor roll every semester of middle school. I'm the youngest of a family of five. I have a cat and she loves to bother me when I'm working on my homework. When I'm not doing homework then I'm either playing the flute or the tenor saxophone. I also love to play softball and basketball. Many say that I'm really good at supporting people when they're at their lowest.

I believe college is important because I want to support myself and my family when I am older. I get told that college is hard and I see all these people all over the internet that dropped out of college because it was too hard mentally for them. I know that I'm only in seventh grade but I try everyday to push myself to try my hardest in school because it's important to me. I don't want to get a job that I don't like because I never want to go to college and don't have enough education to get my dream job.

I haven't really fully decided what to do as my dream job but I really want to be a graphic designer. I want to do this because I really

love drawing but I'm not the greatest at it. I have always admired the work of ever graphic designer that has designed comic books. I really admired artists in general that work hard to get their name out into the community for the graphic designs they do.

I just want to get enough income from being a graphic designer to help myself. But that is what I'm wishing to become when I grow older. I just need the money for four years of college at the bare minimum. I don't want to go to college for most of the years I need but not enough for all four years. I want to go to college to prove people wrong that I will accomplish something that's really big for me and my family to celebrate.

I want to go to college to become a graphic designer so that I can be me, tell you why it's important to go to college, and tell you what I want to be when I grow older.
