

## Why I Want to Go to College

When someone asks me about my future, millions of possibilities run through my head. Whether I am running my own business, speaking in a different language, taking care of and training animals, or helping people in need. For me, college is a leg up to these goals. I can make more money, learn more, achieve goals, and realize dreams. No matter what I decide to do, a college education will help me achieve it.

I want to have a large family, and to financially support my family, I need a good job. The more qualified I am, the higher chance I have at being hired. If I get a job that pays well, I could make enough money to provide for my loved ones. Going to college can help me take care of myself and my family.

It has always been a goal of mine to be fluent in Spanish. Spanish speaking people would feel more appreciated, included, and useful if they could talk to people in their own language. Speaking another language is always a beneficial skill. I could be a translator, help Spanish speakers adapt to new places, or be a Spanish teacher. If I want to live up to my full potential in Spanish, I need to go to college.

Animals are my passion, and I have always dreamt about taking care of them. The best way for me to get a job involving animals is to take college classes about animals and their behavior. Being good at taking care of animals will help me get the career I want. Going to

college will help me get better at anything I set my mind to. College can help me realize and achieve my dreams.

College is like a bridge crossing a river, expanding my world and letting me explore more interesting, and better paying jobs. If I cross the water, I can have the future I imagine. I can make more money, learn more, achieve goals, and realize dreams. Staying behind, on the other hand, will leave me stuck in boring, lower paying jobs, reliving the same day again and again. The only way to improve is by moving forward and taking the next step. And for me, the next step is college.
